

The Lonely Leprechaun

When the Earth became too Warm

When a young girl, named Sally, writes by candle light, her muse magically appears as Sandy, the lonely leprechaun. Sandy desperately needs Sally's help to find his friends, so they can keep the world green.

Where are all the other leprechauns?

As Sally continues to write, her imagination takes flight on a global search. Her journey reveals that the earth is getting too warm and Sandy's friends are nowhere to be seen.

Sally is guided by a goose, an ostrich, two penguins and a parrot, to the missing leprechauns who are cooling the egg of a mother dragon.

Sally learns that helping cool the earth will insure the return of Sandy's friends and she is further rewarded by witnessing the birth of a baby dragon!
