

Maritime Marionettes Technical Requirements for Hall, when travelling by air

We provide: ~ Lighting system ~ 45 - 50, minute performance

Loading:

When there are stairs to the loading door or the venue, two to four adult helpers are required to help load and unload equipment .(An average load-in or out takes 5-10 minutes.) Please, check that access to the loading door is clear .

Arrival time: 2 hours before the first performance

1. Load out time: Begins 45 minutes after the end of the last performance

Stage, electrical and hall:

1. **We require a 3 foot high platform, 20 feet wide x 8 feet deep**
2. Sound System. Two speakers and amplifier. (to play sound track we provide on laptop)
3. If possible, windows to be covered (blackout enhances performance)
4. Two electrical outlets, on separate circuits and extension cords.
5. Drinking water to be provided for the 2 performers.
6. Bells, loud sounds or announcements to be turned down during the performance, (if possible).

Seating:

There are ways to arrange the seating that the performers will guide you on before the show.

Generally it works to have floor level seating in front of the stage for children and adults who wish (please provide carpet if possible). Behind the floor seating a row of benches for adults and then a row behind the benches and along the sides of chairs and/or bleachers, helps provide an auditorium-like feel to a room that has a level floor.

THANK YOU AND WE LOOK FORWARD TO PERFORMING FOR YOU!
