

Purple Puppet Wagon technical:

Maritime Marionettes provides stage, lighting and sound.

We pull the wagon with our van, (which is 20 feet long), with the Puppet Wagon makes the total length 42' for manoeuvring. We also bring a small hand truck when needed in tight spaces.

The measured length of the Purple Puppet Wagon, from tongue to back door opening is 22'. The height at the peak is 9' 4" , and width is 7'6".

We will need access to one power outlet (minimum), preferably 2 outlets on separate circuits.

Most of the children sit on the ground, but it is best to have some seating for adults in the audience.
